Augusto da Rocha Polonio

Game Developer • Senior Full Stack Engineer

Ivoti, Brazil (Remote) augustodrp@gmail.com +55 (51) 98270-7242

PROFESSIONAL SUMMARY

Senior Software Engineer and Indie Game Developer with 14+ years building SaaS, web, and mobile products, and 11+ years developing independent games for PC, mobile, and web. Experienced in leading technical initiatives, architecture modernization, CI/CD, mentoring, and performance optimization. Currently transitioning career focus into Game Development, merging technical depth with a lifelong passion for interactive experiences, using Unity, Godot, and Three.js. Strong record of adopting AI-assisted workflows and exploring open-source AI tools to accelerate the development workflow.

WORK EXPERIENCE

Osten Games - Game Developer (Freelance)

João Pessoa, BR (Remote) | SEP 2026 - PRESENT

- Contributed to enhancing the overall visual and audio quality of 28 characters in the game.
- Responsibilities included fixing and adding missing animations, adapting visual effects with multiple muzzle points, balancing sound effects, and ensuring consistency between sandbox testing and gameplay.
- Owned delivery for Game Developer (Freelance) initiatives, aligning architecture and product requirements.
- Worked on improving character animations, VFX, and SFX for the mobile game DATA2073 – Merge Siege.
- Main tech: Unity, C#, Blender, Affinity Designer, Audacity.

Master Cat Games - Game Developer (Self-Employed)

Ivoti, BR | MAR 2020 - PRESENT

- Founded an indie game studio to experiment with game design, develop portfolio projects, and participate in game jams.
- Produced audio for games and media projects using DAWs (Studio One, Sonar), AI music generation with SUNO AI, and AI dubbing workflows via text-to-speech.
- Explored AI-assisted workflows with open-source local tools (Ollama, LM Studio Bionic, OpenCode) to accelerate the development processes.
- Designed and released mobile and PC games using Unity and Godot, including Oliver the Octopus (2nd place at LudiJam #01).
- Built open-source tools for Three.js, contributing to the web game development community.
- Main tech: Unity, C#, Godot, GDScript, Blender, Three.js, Tiled, Aseprite, Photoshop, Illustrator, Blender, Studio One, Sonar.

Quattrus - Tech Lead & Senior Full Stack Software Engineer

Porto Alegre, BR (Remote) | FEB 2022 - AUG 2026

- Led technical initiatives across multiple SaaS ERP systems, collaborating with architects and engineers to deliver new features and modernize platforms.
- Mentored developers, enforced clean code practices, and conducted code reviews with focus on SOLID principles.
- Optimized performance across multiple systems and guided product teams in defining scalable solutions.
- Migrated legacy applications to modern stacks, improving scalability and maintainability.
- Drove transition to spec-driven development and integrated AI tools (GitHub Copilot, Amazon Kiro) to accelerate prototyping, code review, and automation.
- Main tech: React, Node.js, TypeScript, Sencha ExtJS, JavaScript, .NET, SQL Server.

Qualitin - Mid/Senior Full Stack Developer

Porto Alegre, BR (Remote) | JAN 2016 - FEB 2022

- Redesigned key user journeys and interfaces, improving usability for quality-management teams and reducing support friction.
- Raised engineering quality by introducing maintainable coding standards, structured code reviews, and stronger delivery discipline.
- Designed and shipped a reusable API layer for the main product, improving integration speed across internal and external systems.
- Delivered and maintained Android and iOS features, including push-notification flows integrated with OneSignal.
- Modernized legacy mobile codebases by upgrading Sencha Touch and Cordova versions, improving device compatibility and stability.
- Main tech: .NET, C#, HTML, CSS, JavaScript, jQuery, JSON, SQL Server, Web Services, APIs, Sencha ExtJS, Cordova, Swagger, LINQ, NHibernate.

While Tech - Game Developer

Porto Alegre, BR (Remote) | MAR 2017 - JUN 2017

- Collaborated with product and art stakeholders to align game interactions with learning objectives.
- Optimized performance and input responsiveness for mid-range Android devices to improve playability.
- Implemented core gameplay loops and scoring mechanics focused on educational engagement and player progression.
- Prepared release-ready builds and validated quality across gameplay, UI polish, and asset integration.
- Main tech: Unity, C#, Photoshop, Illustrator.

Sollus - Full Stack Developer

Porto Alegre, BR | OCT 2015 - JAN 2016

- Developed new modules for the core business software, improving operational workflows for finance teams.
- Partnered with stakeholders to prioritize delivery scope and reduce implementation risk during rollout.
- Maintained and evolved CRM and web systems to ensure continuity, stability, and faster issue resolution.
- Integrated legacy data sources into the new refund solution, aligning technical constraints with business rules.
- Main tech: ASP.NET MVC, C#, PHP, HTML, CSS, JavaScript, Bootstrap, SQL Server, Web Services, LINQ, NHibernate.

Qualitin - Full Stack Developer

Porto Alegre, BR | JUL 2013 - SEP 2015

- Applied Scrum and pair-programming practices to increase delivery predictability and team collaboration.
- Led migration of critical dashboard and UI modules, enabling faster product evolution and improved maintainability.
- Designed and implemented a unified login flow across applications, strengthening security and user experience consistency.
- Resolved high-priority sprint blockers and production issues with strong ownership and cross-team coordination.
- Main tech: ASP.NET, C#, HTML, CSS, JavaScript, Sencha ExtJS, SQL Server, LINQ, NHibernate.

EDUCATION

Degree in Systems Analysis and Development

Senac-RS | 2013-2015 (Completed)

Focus on software engineering fundamentals, systems design, and web technologies.

SKILLS

TECH STACK

TypeScript • JavaScript • C# • SQL • HTML • CSS • GDScript

FRAMEWORKS

React • Next.js • Node.js • .NET • Sencha ExtJS

GAME DEVELOPMENT

Unity • Godot • Three.js • Phaser • Blender • Tiled • Aseprite • Unreal Engine (Learning)

CREATIVE & MEDIA TOOLS

Affinity • Photoshop • Illustrator • Blender • DaVinci Resolve • Studio One • Sonar • Pro Tools • After Effects

PRACTICES

Technical Leadership • CI/CD • Spec-Driven Development • Code Reviews • SOLID

AI TOOLING

GitHub Copilot • Amazon Kiro • Ollama • LM Studio • OpenCode • SUNO AI • Text-to-Speech

LANGUAGES

- Portuguese (Native)
- English (B2)
