

Augusto da Rocha Polonio

EXPERIENCE

Quattrus, Porto Alegre, BR (Remote) — Tech Lead and Sr. Full Stack Software Engineer

FEB 2022 - PRESENT

Led technical initiatives across multiple SaaS ERP systems, collaborating with architects and engineers to deliver new features and modernize platforms.

Mentored developers, enforced clean code practices, and conducted code reviews with focus on SOLID principles.

Designed and maintained CI/CD pipelines ensuring reliable deployments.

Drove transition to spec-driven development and integrated AI tools (GitHub Copilot, Amazon Kiro) to accelerate prototyping, code review, and automation.

Optimized performance across multiple systems and guided product teams in defining scalable solutions.

Migrated legacy applications to modern stacks, improving scalability and maintainability.

Main tech: React, Typescript, Sencha ExtJS, JavaScript, .NET, SQL Server.

Master Cat Games, Ivoti, BR — Game Developer (self-employed)

MAR 2020 - PRESENT

Founded an indie game studio to experiment with game design, develop portfolio projects, and participate in game jams.

Designed and released mobile and PC games using Unity and Godot, including Oliver the Octopus (2nd place at Ludijam #01).

Built open-source tools for Three.js, contributing to the web game development community.

Explored AI-assisted workflows with open-source local tools (Ollama, LM Studio Bionic, OpenCode) to accelerate the development processes.

Maintained organized repositories with GitHub/Bitbucket and optimized workflows using Trello and Notion.

Main tech: Unity, C#, Godot, GDScript, Three.js.

Qualitin, Porto Alegre, BR — Mid/Sr. Full Stack Developer

JAN 2016 - FEB 2022

Analyzed, planned, coded, tested, and documented web applications (SaaS ERP systems) for the quality management field.

Introduced best coding practices to promote easy maintenance and improve performance.

Redesigned UI and UX of some projects.

Created an API for the company's main software.

Developed, maintained, and published new features for Android and iOS mobile applications.

SKILLS

I have experience with a wide range of tools including:

Sencha ExtJS, Javascript, React, Typescript, .NET, SQL Server, Unity, Godot.

HIGHLIGHTS

More than 14 years of experience in Web Development.

Trained new trainees who are now core developers.

Helped to develop and deploy the Quattrus's Design System.

Leadership with empathy, understanding the needs of the squad, **being aware of their feelings and thoughts.**

Lead the legacy API migration from .NET 4 to .NET8.

Designed and Lead the Login system migration inside Qualitin, used in other company's apps.

Proven ability to optimize system performance, resulting in **improved efficiency and user experience.**

My first challenge as a developer was to **migrate the main dashboard to ExtJS,** which allowed Qualitin to close a deal involving **3k new licenses in one month.**

LANGUAGES

Portuguese

English (B2)

Collaborated with the marketing team to integrate RD Station, enhancing digital marketing automation and management.

Integrated the e-commerce system Vindi with web applications.

Enhanced push notifications of mobile apps, integrating with OneSignal.

Upgraded Sencha Touch applications, as well as Cordova versions to increase compatibility.

Managed the workflow and documented all the processes using JetBrains YouTrack and after DevOps.

Main tech: .NET, C#, HTML, CSS, JavaScript, JQuery, JSON, SQL Server, Web Services, APIs, Sencha ExtJS, Cordova, Swagger, LINQ, NHibernate.

While Tech, Porto Alegre, BR (Remote) — *Game Developer*

MAR 2017 - JUN 2017

Developed an educational mobile game for Android called Color Melody Piano.

Main tech: Unity, C#, Photoshop, Illustrator.

Sollus, Porto Alegre, BR — *Full Stack Developer*

OCT 2015 - JAN 2016

Planned and built a refund software for the financial area.

Developed new features for the company's main software.

Worked in maintenance of web pages and CRM software.

Analyzed and worked in data integration of legacy systems, adapting to the business model.

Main tech: ASP.NET MVC, C#, PHP, HTML, CSS, JavaScript, Bootstrap, SQL Server and Web Services, LINQ, NHibernate.

Qualitin, Porto Alegre, BR — *Full Stack Developer*

JUL 2013 - SEP 2015

Improved the front-end of the company's main software, migrating the Microsoft Silverlight and the old ASP.NET pages to Sencha ExtJS. This change allowed the company to close a deal with a new client in a short-time development.

Developed new login for all applications, improving the security and UI.

Organized and executed tasks, working with Scrum and Pair Programming as an agile method.

Solved technical problems of sprint backlog.

Main tech: ASP.NET, C#, HTML, CSS, JavaScript, Sencha ExtJS and SQL Server, LINQ, NHibernate.

EDUCATION

Senac-RS — Systems Analysis and Development

JAN 2013 - DEC 2015

OTHER

Experienced Full Stack Developer **proficient** in technologies such as **Sencha ExtJS** (MVC and MVVM architectures) and **JavaScript**.

Improving knowledge in technologies like: **Node.js**, **React**, **React Native**, **TailwindCSS**, **NextJS**, **Docker**, **Microservices**.

I have a strong passion for technology in general, so I am always studying to keep myself up to date.

Open to international opportunities and career growth.

Willing to relocate to a new country, work in a remote or hybrid environment.
